Title

Ritz

Project URL

https://javenw.itch.io/ritz

Short description or tagline

Shown when we link to your project. Avoid duplicating your project's title

A procedural domino puzzle where every board is different and every placer

Classification

What are you uploading?

Games — A piece of software you can play

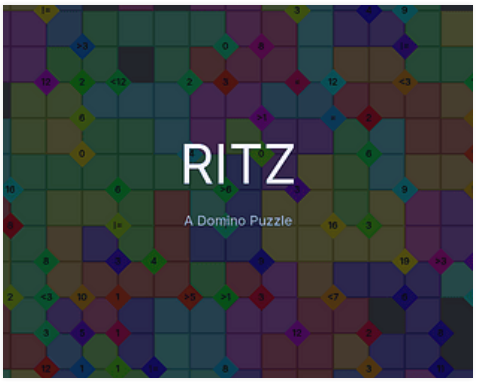
Kind of project

HTML — You have a ZIP or HTML file that will be played in the browser

TIP *You can add additional downloadable files for any of the types above*

Release status

Released — Project is complete, but might receive some updates



The cover image is used whenever itch.io wants to link to your project from another part of the site. Required (Minimum: 315x250, Recommended: 630x500)

Gameplay video or trailer

Provide a link to YouTube or Vimeo.

eg. https://www.youtube.com/watch?v=5JEaA47sP

Screenshots

Optional but highly recommended. Upload 3 to 5 for best results.

Pricing

☑ **$0 or donate** ☐ **Paid** ☐ **No payments**

Someone downloading your project will be asked for a donation before getting access. They can skip to download for free.

Suggested donation — Default donation amount

$2.00

Uploads

Upload a `ZIP` file containing your game. There must be an `index.html` file in the `ZIP`. Or upload a `.html` file that contains your entire game. Learn more →

Any additional files you upload will be made available for download. You can apply a minimum price to the project after uploading additional downloadable files.

html.zip More... Delete file

☑ This file will be played in the browser

Upload files or Choose from Dropbox Add External file ?

File size limit: 1 GB. Contact us if you need more space

TIP *Use butler to upload files: it only uploads what's changed, generates patches for the itch.io app, and you can automate it. Get started!*

Embed options

How should your project be run in your page?

Embed in page Manually set size

Viewport dimensions

Width 1280 px × Height 720 px

Frame options

☐ Mobile friendly — Your project can run on mobile phones (smaller resolution and touch support)

☑ Automatically start on page load — Not recommended for Unity games, since they can lag the browser when loading

☐ Fullscreen button — Add a button to the bottom right corner of your embed to make it fullscreen

☐ Enable scrollbars — Enable scrollbars in the iframe that contains your project

☐ `SharedArrayBuffer` support — **(Experimental)** This may break parts of the page or your project. Only enable if you know you need it. Learn more

Details

Description — This will make up the content of your game page.

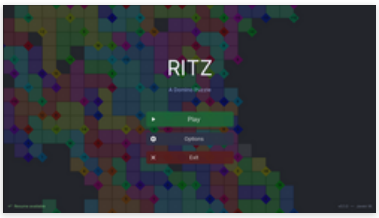
Ritz

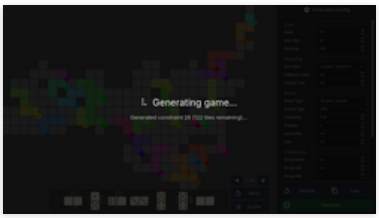
Ritz is a single-player logic puzzle game that fuses the classic feel of dominoes with constraint-satisfaction brain teasers — and generates a completely fresh board every time you play.

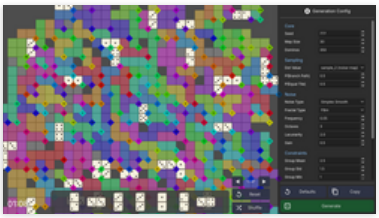
How It Works

A grid of tiles is procedurally laid out across the board. Each tile shows a pip value between **0 and 6,** just like a real domino face. Pairs of adjacent tiles are bonded together into dominoes, and groups of tiles on the board are marked with **mathematical constraints**— rules that must hold true when the board is complete.

Your job: drag every domino from the side panel and drop it onto its







Add screenshots

matching pair of tiles on the board. The domino locks in when the pip values on both halves match the tiles underneath. **Every constraint must be satisfied at the same time for you to win.**

Constraints

Coloured overlays highlight constraint groups on the board. A small badge at the corner of each group tells you the rule that applies:

'n'	**SUM** — tiles in this group must add up to exactly n.
`=`	**EQUAL** — all tiles must share the same value.
`!=`	**NOT EQUAL** — no two tiles may share the same value.
`<n`	**LESS THAN** — total must be less than n.
`>n`	**GREATER THAN** — total must be greater than n

Constraints are generated from the actual tile values, so **every puzzle is always solvable**—but finding the arrangement that satisfies all constraints at once is the challenge.

Controls

Pick up / drag a domino	Click and drag
Rotate a domino	Double-click
Pan the camera	Arrow keys
Reset camera	Space
Reset all dominoes	Reset button (HUD)
Return to main menu	Escape

Features

- **Fully procedural** — tile layout, pip values, domino pairings, and constraints are all generated from a seed, giving you a unique puzzle every time.

- **Five constraint types** — SUM, EQUAL, NOT EQUAL, LESS THAN, and GREATER THAN keep every board feeling different.

- **Auto-save & resume** — progress is saved automatically after every placement. Pick up exactly where you left off, including your elapsed time.

- **Generation panel** — tweak the seed, grid size, domino count, noise parameters, and constraint probabilities at runtime to craft your own challenge.

- **Classical background music** — a shuffled, endless queue of Bach's *Well-Tempered Clavier* (performed by Kimiko Ishizaka) plays as you solve puzzles. A "Now Playing" notification fades in at the top of the screen when

each new piece begins.

- **Animated board generation** — watch the board build itself tile by tile when a new game starts.

About

Ritz was built with **Godot 4.5** (GDScript, GL Compatibility renderer). The pip patterns on dominoes are rendered entirely on the GPU via a custom GLSL shader — no sprite atlas required.

Genre

Select the category that best describes your game. You can pick additional genres with tags below

Puzzle

Tags — Tips for choosing tags

Any other keywords someone might search to find your game. Max of 10.

Avoid using the genre or platforms provided above.

brain-teaser × constraint-satisfaction × domino × godot × logic-puzzle ×
math × procedural × puzzle × relaxing × singleplayer ×

AI generation disclosure NEW — Learn more →

Please disclose if this project contains content produced by generative AI tools such as LLMs, ChatGPT, Midjourney, Stable Diffusion, etc., even if you hand-edited it.

- (●) Yes — This project contains the output of Generative AI
- ( ) No — This project does not contain the output of Generative AI

What kind of AI generated content is used?

Classification of AI-Generated content is mandatory. Your classification will be used to add additional filtering tags to your project.

☐ Graphics ☐ Sounds ☐ Text & Dialog ☑ Code

App store links

If your project is available on any other stores we'll link to it.

+ Steam + Apple App Store + Google Play + Amazon App Store
+ Windows Store

Custom noun

You can change how itch.io refers to your project by providing a custom noun.

Leave blank to default to: 'game'.

Optional

Community

Build a community for your project by letting people post to your page.

- ( ) Disabled
- (●) Comments — Add a nested comment thread to the bottom of the project page
- ( ) Discussion board — Add a dedicated community page with categories, threads, replies & more

Visibility & access

Use Draft to review your page before making it public. Learn more about access modes

- Draft — Only those who can edit the project can view the page
